CAREER OBJECTIVE

Electronics Design and Testing Engineer with 1+ year of experience in designing and developing electronic components and modules for ATM machines, seeking a challenging role in Designing where I can leverage my skills in PCB design, schematic capture, simulation and modeling, and testing and automation, troubleshooting and debugging to drive innovation and growth. I aim to be part of a progressive organization that values technical excellence, innovation, and employee development, and provides opportunities for mutual growth and success.

PROFESSIONAL EXPERIENCE

Electronics Design and Testing Engineer

NCR Corporation India Pvt Ltd – Chengalpattu, Tamil Nadu

June 2024 - May2025

- **Performed comprehensive testing** (functional, performance, environmental, and compatibility) on ATM machine components to ensure reliability and compliance with industry standards.
- **Developed and executed test plans and cases**, identified defects, and collaborated with development teams to implement corrective actions and improve product quality.
- **Created detailed electronic circuit schematics** and worked on **PCB design and layout** using OrCAD and similar tools, ensuring accurate design and functionality of ATM components.
- **Implemented quality control processes** for electronic circuits and **PCB manufacturing**, including inspection, validation, and defect analysis, to identify root causes and prevent future issues, resulting in reduced defects.

Automation Testing Engineer

NIRAL Automation Private Limited – Hosur, Tamil Nadu

September 2025 – Present

- **Performed automation testing and troubleshooting** for industrial machines, ensuring smooth operation and minimizing downtime.
- **Debugged and optimized C# machine control code**, modified sequences, and resolved errors to enhance system performance and reliability.
- **Configured and deployed machines using backups**, restored systems to full functionality, and ensured accurate integration for operational readiness.
- **Gained hands-on expertise in PLC programming and troubleshooting**, improving automation efficiency and collaborating with cross-functional teams to implement corrective actions.

TECHNICAL SKILLS

- PCB Design and Layout
- Automation testing and Troubleshooting
- OrCAD Schematic Design
- Programmable Logic Control (PLC)
- Technical Documentation

PROJECTS

1. Project Name: Nova Machine

Role: Developer and Tester

Description:

1. Developed machine for running
2. Debugged and optimized C# machine code control
3. Performed automation testing and troubleshooting
4. Implemented PLC programming and Troubleshooting

2. Project Name: Smart Helmet

Role: Developer and Tester

Description:

1. Designed and developed smart helmet prototype
2. Integrated hardware components
3. Implemented PCB design and power management circuit
4. Developed alert system and data transmission logic

SOFT SKILLS

- Leadership & Management
- Effective Communication
- Adaptability

PERSONAL DETAILS

Father's name : Mr. ANNADURAI.S
Mother's name : Mrs. SANTHIA
D.O.B. : 30.04.2003
Languages : **Tamil** (*Native*)
known **English** (*Professional proficiency in speaking, reading, and writing*)
Hindi (*Proficient in Reading and Writing*)

DECLARATION

I affirm that all information provided in this resume is complete, accurate, and up to date to the best of my knowledge.

Yours sincerely,
SANTHOSH KUMAR A.
